TRANSFER OF LANDFILL POND - GHS-399-93

In accordance with the notification requirements of the Draft Interim Pond Water Management Plan transmitted to DOE on April 14, 1993, and with the concurrence of the DOE program representative on July 30, 1993, Surface Water Division (SWD) is submitting a written confirmation of DOE's verbal approval to transfer water from the Landfill Pond to Pond A-1.

Pond A-1 is almost empty, which causes the exposure of the bottom sediments. In order to prevent possible air born suspension of sediment contaminants, SWD has requested permission to transfer water from the Landfill Pond to Pond A-1.

The Landfill Pond was sampled on March 24, 1993, and analyzed for HSL metals, volatile organics, semi-volatile organics, total gross alpha, total gross beta, pH, and nitrates. There were no exceedances of Segment 5 stream standards. The pond was resampled on July 21, 1993, to satisfy the requirements of the quarterly sampling criteria.

The transfer started on August 2, 1993, and was completed August 3, 1993. The transfer was conducted only during daylight hours (approximately 16 hours), and the volume of water transferred was approximately 960,000 gallons.
